- Completely Flexible AirBag, No Rigid parts to hang up in conduit.
- Can be used in partially obstructed or bent conduit. Unlike other inflatables, they are limited only by the size of the knot you tie.
- Use just three sizes to fish 1/2" through 6" Conduit. Easily carry all 3 in your pocket.
- One piece construction, no metal parts or other conductors used for attaching line.
- Can be blown or vacuumed into conduit using low PSI. Most shop vacuums are sufficient.
- Very economical when compared to other line carriers.
- Patent Pending!
